VINYLMASTER PRO ™

Sign Design, Layout and Vinyl Cutting Software — *Professional*

VINYLMASTER PRO - FEATURES & APPLICATIONS

VinylMaster Pro is high-level sign software offering a professional level of artwork design, layout and cutter solutions for all your sign making and cutting needs. Packed with tools and features to design and output everything from decals and lettering through to T-shirt transfers, 3D signage, banners, menu boards, pinstriping, vinyl signs, boxes, stencils, textile and craft items, and much more.

VinylMaster Pro
Professional user interface with sharp on screen graphics that is easy to both learn and use.
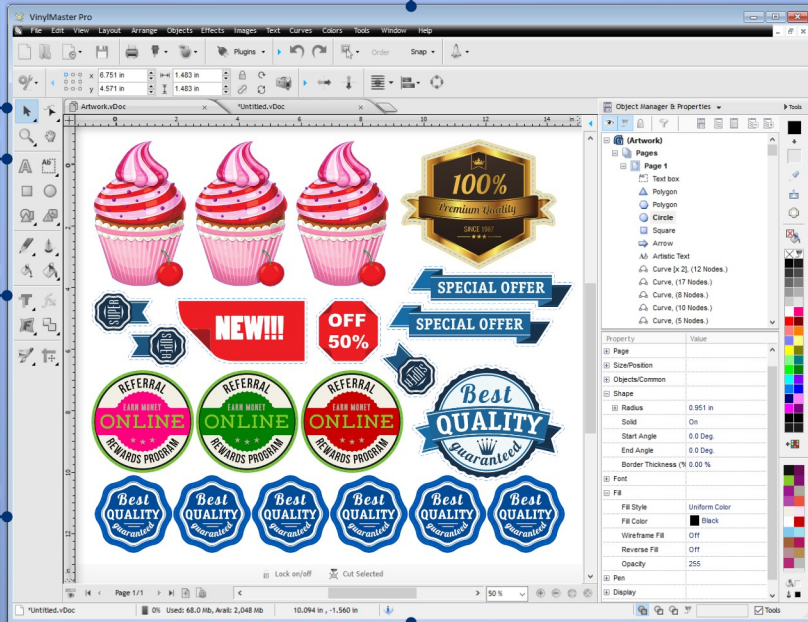

Import/Export (main formats)
Load your client's artwork and save your designs to open with CorelDraw, Illustrator and more

Design Tools
Suite of powerful design tools including 7x power shapes, 5x drawing tools, curve, text and bitmap tools. Plus 9x vector effects, 5x shaping, 5x welding and 10x distortion tools etc.

Layout Tools (large set)
Size, scale, rotate, align, space, distribute, step and repeat plus guides, dimensions and a grid.

DesignCenter
Access the main tools in one central location which can stay open or be hidden away.

Manage and Edit Objects
View, select and move objects with the Object Manager and edit and adjust these using the Property Inspector.
Colors
Work in all major color spaces with access to over 10,000 vinyl color swatches in dozens of vinyl color charts.

Extras (Qty. on back page)
VinylMaster Pro also includes clipart, fonts, corporate logos[2], road, highway and safety signs, textures and gradients.

VinylMaster Pro also includes document tabs for easy navigation between open files. The workspace can be customized with user modes, hide/reveal options and custom toolbars. Plus **VinylMaster Pro** supports ARMS vinyl cutters including those with multi-marks[1] and also comes with an interactive manual, video lessons and factory tech support to put you miles ahead of your competitors!

VINYLMASTER PRO™
## Sign Design, Layout and Vinyl Cutting Software
Professional

VINYLMASTER PRO - ADDITIONAL MODULES

In addition to all its tools **VinylMaster Pro** has a number of modules which are not included with VinylMaster Cut or Ltr, these include 3D modelling, Gradient fills, Text boxes (i.e. text justification, tabs, wrapping), Pen (stroke) styles and a suite of Bitmap effects tools and many more design and cutting tools.

VinylMaster's Contour Cutting wizard guides you through the Print and Cut process with a suite of easy to use tools. Plus VinylMaster has been designed to work with your ARMS vinyl cutter including support for multi marks[1] for the most accurate contour cutting and also supports laser pointer cutters.

VinylMaster Pro has **Cut Documents** which include advanced cut file layout, editing and management tools. Cut Documents allow you to merge colors from multiple documents into a single file that can be nested to save media and weeding time. You can then apply Speed-Weed, Alignment and Hanging Marks, deal with Over-wide and Over-long artwork and much more, and then save the file for later use and cutting.

Included with only VinylMaster Ltr/Pro

VECTORIZER*

The Vectorizer is a specialist utility to trace an image (bitmap) to create vector artwork of the image that can be cut out and scaled to any size without loss in the artwork's quality.

Image Preparation
The Vectorizer works with all major image formats including .bmp, .jpg, .png, and .tif plus many more, and comes with a number of correction tools to prepare and adjust the image on a pixel-by-pixel basis to then be vectorized.

Work with Low-Quality Jpeg's
The Vectorizer has also been designed to work well with low quality .jpg images which are the most common format.

Trace Options
You can set how you'd like the image to be converted into vectors (traced) with the Vectorizer's powerful Trace tools. These tools can greatly improve the results you obtain and can be adjusted and then reapplied as many times as you wish before committing to the final artwork and loading it back into VinylMaster for cutting.

*The Vectorizer is not available in VinylMaster Cut

VINYL SPOOLER

The Vinyl Spooler is a dedicated utility to manage and cut all your artwork (cut files). It allows you to select and process your cut files along with sorting, storing and filtering them to better manage your cutting work flow.
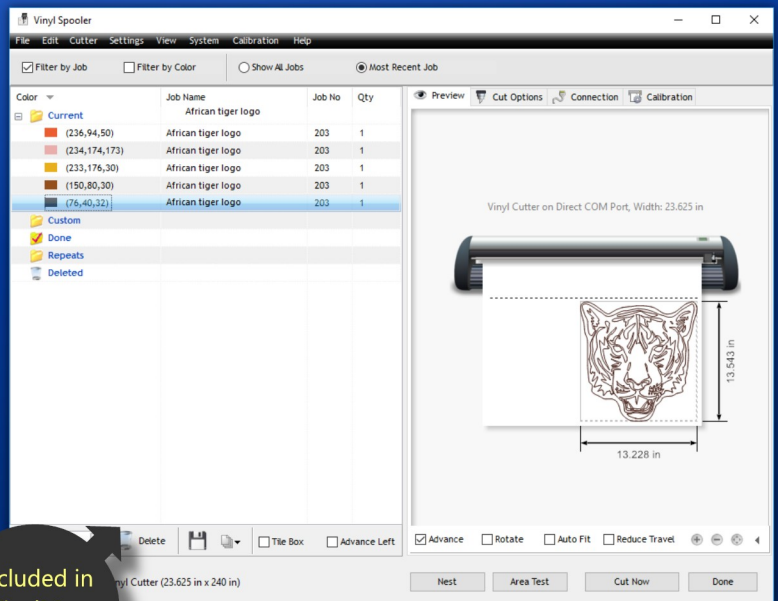

Cutter Setup
The Vinyl Spooler lets you easily adjust your cutter's blade compensation, speed, force etc. along with calibrating the laser pointer and ARMS cutter.[1]
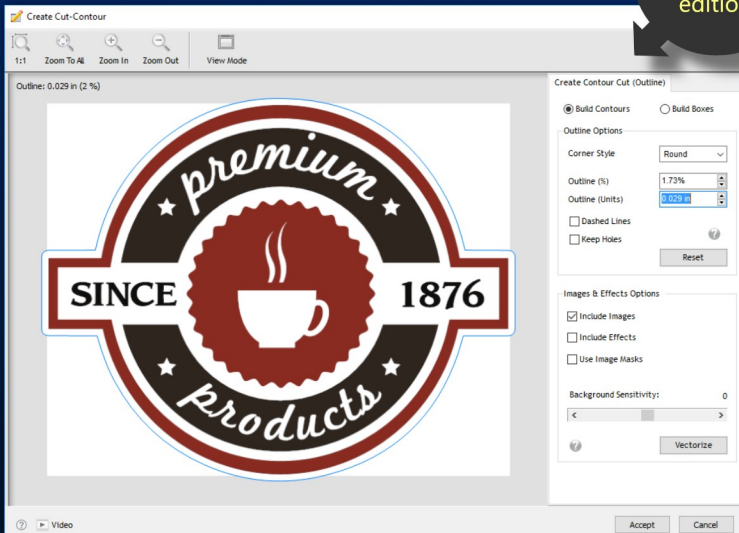

Sort & Preview
Cut files are sorted by job and color. You can also filter cut files so you only work with the jobs you want to. The Vinyl Spooler also provides you with a preview of each cut file, along with its size and position in relation to your cutter.

Save Media
Save Media lets you nest cut files into a single queue ready to be sent to the cutter to save media and weeding time.

Included in all VinylMaster editions

CREATE CUT CONTOUR

VinylMaster includes a contour cut module that automatically outlines selected objects with a system color (contour-cut) which is recognized by VinylMaster's Contour Cutting wizard.

The contour-cut color is also recognized by other programs such as RasterLink and Versaworks when saved as a PDF file for printing.

Image Vectorizing for Contour Cutting
When an image with a white background is loaded into the Create Cut-Contour module it can be vectorized for contour cutting i.e. around the perimeter and any internal holes at a nominated offset.

VinylMaster Outline Module
VinylMaster also includes an Outline module that creates an outline at a measured distance (by unit) or by percentage. This module also includes advanced options such as setting the outline style to a smooth, round, sharp or mitered corner etc.

[1]Where supported by the cutter.

E&OE.

VINYLMASTER™

## Sign Design, Layout and Vinyl Cutting Software

Illustration (above) is of VinylMaster Pro. Some tools displayed are not included with VinylMaster Cut or Ltr.

VINYLMASTER CURVE EDITING

VinylMaster's curves are amongst the most powerful curves in any graphic design program on the market. They are more powerful than Bezier curves which are simply unable to produce such smooth artwork.

Node Editing

Each level of VinylMaster includes on-screen node editing tools. VinylMaster Ltr allows you to reduce nodes with Pro adding node alignment and frames for even greater curve control.

## VINYLMASTER PRO GRADIENT EDITOR

VinylMaster Pro includes a Gradient Editor.*

Gradient fills can greatly enhance the look of your artwork and provide you with an almost limitless number of special effects.

VinylMaster Pro comes with four types of gradient fills:

- Linear •Radial •Square •Conical

*Gradient Editor is not available in VinylMaster Cut or Ltr.
