

HOW TO INSTALL A CARRIAGE.

You will need to remove the right cover (usb side). Then you will need to loosen the top tightening screw that holds the pulley. Then you will need to remove the screw holding the pulley. Once done with this can you please remove the two sheet metal screw hold the bracket. From here you will need to go to the carriage and remove the two top wheels release the carriage from the bracket. From here you will need to remove the carriage cover and loosen the Allan screw that hold the knife catch(don't loose the spring and the spring placement pad).
