

REPLACING THE KNIFE CATCH

- 1) Tools needed
 - a. Philip head screw driver
 - b. 2.5 mm Allen wrench
- 2) Remove the right side end cover (usb side).
- 3) Remove the vertical tightening screw that holds the pulley.
- 4) Once done with this, remove the two sheet metal screws holding the bracket.
- 5) Go to the carriage and remove the two top wheels and release the carriage from the bracket.
- 6) Remove the carriage cover and loosen the black Allen screw that holds the knife catch in place on the right side (don't lose the spring and the spring placement pad).
- 7) Once the old knife catch is removed, put the new one in its place and tighten the Allen screw.
- 8) Reverse directions to put the system back together.
