Flexi Setup

For the CR630/CR1200
Open the Device Manager by going to the Control Panel: Device Manager.

For Windows XP, go to: Control Panel: System: Hardware: Device Manager

The cutter should be plugged in and turned on during this process.
1-2 Device Manager

- Click on your USB connection under the Ports section.
1-3 Device Manager

- Right-Click and select Properties
1-4 Device Manager

Go to the Port Settings tab.

Click the 'Port Settings' tab.

Under 'Device type:', select 'Ports (COM & LPT)'.

Under 'Manufacturer:', select 'FTDI'.

Under 'Location:', select 'on USB Serial Converter'.

Press 'OK'.

This device is working properly.
1-5 Device Manager

- Verify your baud rate is set to 4800, 9600, or 19200.
  - Whichever rate you choose, this same rate needs to be set in Flexi and on the cutter itself.

- Adjust the Flow Control to “Hardware” from this same screen.
1-6 Device Manager

- If the COM number needs to be changed, click on the Advanced Settings button.

- Change the COM number on the top dropdown.

- Click OK when finished.
To add a new setup in Flexi, open the Production Manager.

Go to Setup: Add Setup.
2-2 Flexi

- Select the brand and Cutter Type.
2-3 Flexi

- On the next page, select which COM port the cutter is connected to.

- This information is on the device manager.
2-4 Flexi

- The Flow Control should be set to “XOn/XOff”

- Click Finish and you’re done!
To change settings after the initial setup of the cutter:

- Go to the cutter in Production Manager, right click and select “Change Port”.

2-5 Flexi
3-1 Cutter

- To check the cutter’s baud rate when online:
  - Click the “Online” button.
  - Click “Mode” until you get to the screen that reads ‘Baud’.
  - To change this setting, hit the “+” and “-” buttons.
  - Click “Mode” to get back to the main screen, then “Online” to get back online.
The Baud rate is the rate of transfer of information from the computer to the cutter. This number must match in 3 places in order for information to be processed correctly.

1. In the cutter as previously described.
2. In the Device Manager (Listed as “Bits per second”)
3. In Flexi (Listed as “Bits per second”)

4-1 BAUD
CutterPros does not support Flexi in any way beyond initial setup. Please review the Flexi Help for more information.
