Testing the Cutter
For the ProCut Contour Series of Cutters
1-1 Testing

- Turn the cutter on.
- Once the cutter starts up, the screen should look like the image below.
1-2 Testing

- Press the ‘Test’ button on the panel.
1-3 Testing

- This will cut out a small triangle on the vinyl.

- To look at the cut, move the vinyl forward.
  - Click the On/Off Line button and use the Speed Up and Down arrows to adjust the vinyl.
1-4 Testing

- Weed out the area around the triangle to ensure accuracy of pressure.
- If the triangle does not weed, adjust the force up by clicking the left Force arrow.
- If it cuts too deep, adjust the force down by clicking the right Force arrow.
1-5 Testing

- When finished with adjustments, move the vinyl and carriage to an area of unused vinyl.

- Once the blade is ready for another cut, press the Enter button.
1-6 Testing

- Repeat steps 1 through 5 until the cutter is cutting deep enough for the vinyl to weed, but not enough for the blade to cut into the backing.

- For more information on setting up the blade, see our ProCut Contour Cutter Setup Tutorial.
The End

Please review our tutorials for more information on particular features.
