Layering Tools

For Signcut
To add registration marks for layering multi-color images, click the red diamond tool on the bottom toolbar in Signcut.
1-2 Layering Tools

- Select the side you would like to layer from and click along the edge of the image. This will create triangles along the edge of the image.

- If you do not wish to place the registration marks along the edge, it will create red diamonds wherever you click.

- It is recommended that these marks are not added on top of the image or it will cut extra marks on the image itself.
Once the registration marks are added to the image, specific colors can be selected on the right side toolbar.

Layering can be done with single color images also.

Just create the registration marks and cut the full image on each color of vinyl you wish to use, then lay them together.
Every color on an image shows up on the right side bar.

To view a particular color alone, click the color on the right side.

To view multiple colors, click each color separately while holding down the CTRL key.
